## **Editorial Review**

### **Review**

“For this Compendium, the editors have succeeded in bringing together a team of highly competent authors comprising 28 experts from the fields of university research, regulation, and legislation. ...For the first time, general information on the prevention and avoidance of food spoilage has been published in one comprehensive book devoted to this topic. ...In summary, this is an excellent and highly topical publication on ‘food microbiology and safety’ that is enthusiastically recommended to all those interested in the subject.” (Leopold Jirovetz, University of Vienna, in *Die Ernährung/Nutrition*)

### **From the Back Cover**

The Compendium of the Microbiological Spoilage of Foods and Beverages is, to our knowledge, the first major publication devoted exclusively to this topic. Comprehensive coverage of microbiological spoilage has been provided by 28 contributors, most of whom have had long and successful careers in the food industry. Their comprehensive experience and knowledge of the microbiological spoilage of foods and beverages and its means of control and prevention have been collected and organized into 12 chapters that include all of the principal food and beverage categories.

This Compendium will be a useful resource for many audiences. It will assist academic and food industry researchers in the development of products and manufacturing processes that will minimize or prevent product spoilage. It will assist quality assurance and engineering personnel in the operation of manufacturing plants so that spoilage is minimized. It is expected that the Compendium will be an important text book for advanced food microbiology classes. It is also likely that public health and non-governmental organizations that are working in developing countries will be able to use information from the Compendium to minimize food spoilage during transportation and storage of foodstuffs, thereby providing their target populations with increased food security.

### **William H. Sperber**

With undergraduate majors in zoology and chemistry, William Sperber earned M.S. and Ph.D. degrees in microbiology at the University of Wisconsin. While working for more than forty years with three major food companies, Best Foods, Pillsbury, and Cargill, he became one of the world’s experts in designing and controlling the microbiological quality and safety of foods. Long active in professional and governmental organizations, he is the author of numerous presentations and publications. Now retired, he works part-time as Cargill’s Global Ambassador for Food Protection, where he originated the idea and continues to promote the formation of a new United Nations organization, the Food Protection Organization, to better protect the quality and safety of the global food supply.

### **Michael P. Doyle**

With B.S., M.S. and Ph.D. degrees in bacteriology/food microbiology earned at the University of Wisconsin-Madison, Michael Doyle is a Regents Professor of Food Microbiology and Director of the Center for Food Safety at the University of Georgia. He has served as a scientific advisor on food microbiology topics to many national and international organizations, including the World Health Organization, Food and Agriculture Organization of the United Nations, the International Life Sciences Institute-North America and many federal food agencies. He is an active researcher on interventions to control microbes in foods, with more than 350 scientific publications on microbiology topics.

## **Users Review**

### **From reader reviews:**

#### **Shelly Gomes:**

Do you have favorite book? Should you have, what is your favorite's book? Guide is very important thing for us to understand everything in the world. Each book has different aim or perhaps goal; it means that reserve has different type. Some people experience enjoy to spend their time to read a book. They are really reading whatever they take because their hobby is actually reading a book. What about the person who don't like reading through a book? Sometime, man or woman feel need book whenever they found difficult problem as well as exercise. Well, probably you will require this Compendium of the Microbiological Spoilage of Foods and Beverages (Food Microbiology and Food Safety).

#### **Mark Blanding:**

The book Compendium of the Microbiological Spoilage of Foods and Beverages (Food Microbiology and Food Safety) make one feel enjoy for your spare time. You need to use to make your capable more increase. Book can being your best friend when you getting anxiety or having big problem along with your subject. If you can make studying a book Compendium of the Microbiological Spoilage of Foods and Beverages (Food Microbiology and Food Safety) being your habit, you can get much more advantages, like add your capable, increase your knowledge about some or all subjects. You could know everything if you like available and read a publication Compendium of the Microbiological Spoilage of Foods and Beverages (Food Microbiology and Food Safety). Kinds of book are a lot of. It means that, science guide or encyclopedia or other people. So , how do you think about this e-book?

#### **Marilyn Urquhart:**

Are you kind of occupied person, only have 10 or perhaps 15 minute in your day to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you have problem with the book than can satisfy your short time to read it because this all time you only find publication that need more time to be read. Compendium of the Microbiological Spoilage of Foods and Beverages (Food Microbiology and Food Safety) can be your answer as it can be read by you actually who have those short spare time problems.

#### **Yolanda Sartain:**

A lot of guide has printed but it is unique. You can get it by net on social media. You can choose the most

effective book for you, science, comedy, novel, or whatever by searching from it. It is known as of book Compendium of the Microbiological Spoilage of Foods and Beverages (Food Microbiology and Food Safety). You can contribute your knowledge by it. Without departing the printed book, it could add your knowledge and make a person happier to read. It is most essential that, you must aware about publication. It can bring you from one destination for a other place.
