**Human Ecology: How Nature and Culture Shape Our World** By Frederick R. Steiner

Humans have always been influenced by natural landscapes, and always will be—even as we create ever-larger cities and our developments fundamentally change the nature of the earth around us. In *Human Ecology*, noted city planner and landscape architect Frederick Steiner encourages us to consider how human cultures have been shaped by natural forces, and how we might use this understanding to contribute to a future where both nature and people thrive.

Human ecology is the study of the interrelationships between humans and their environment, drawing on diverse fields from biology and geography to sociology, engineering, and architecture. Steiner admirably synthesizes these perspectives through the lens of landscape architecture, a discipline that requires its practitioners to consciously connect humans and their environments. After laying out eight principles for understanding human ecology, the book's chapters build from the smallest scale of connection—our homes—and expand to community scales, regions, nations, and, ultimately, examine global relationships between people and nature.

In this age of climate change, a new approach to planning and design is required to envision a livable future. *Human Ecology* provides architects, landscape architects, urban designers, and planners—and students in those fields—with timeless principles for new, creative thinking about how their work can shape a vibrant, resilient future for ourselves and our planet.

## Editorial Review

### Review

"Frederick Steiner makes ecology very human, pure and simple... he weaves a regional cross-cultural 'humanitas' back into the sometimes antiseptic field of human ecology. We need Steiner and, although she never complains, so does Nature."

(Grant Jones *poet and landscape architect, Jones & Jones Architects and Landscape Architects, Ltd.*)

"I recommend this book as essential reading for those who dare seek fresh perspectives on the many relationships between humans and their environments."

(Kristina Hill *Ph.D., Associate Professor, University of California Berkeley*)

"By establishing a common framework for communication across disciplines, Steiner provides a common way of seeing—whether from the space shuttle window or a 25X-power microscope—down the tangled path of natural systems and human knowledge toward a sustainable future."

(*Journal of the American Planning Association* )

"*Human Ecology* presents the reader with a rich overview of human's struggle to understand, interpret, and organize our world. This book is tailored for those who enjoy an intellectual immersion into the theoretical and practical challenges of addressing the environmental crisis...and should be of interest to academics, professionals, and the general public."

(*Landscape and Urban Planning*)

"Thoughtful and articulate"

(*Quarterly Review of Biology*)

"Steiner's book joins May Watts' *Reading the Landscape* and Aldo Leopold's *A Sand County Almanac* as a guide to carefully seeing and critically evaluating the landscape around us."

(*CELA Forum*)

"[Steiner's] approach in examining the relevancy of human ecology to planning and design is not to tell us what to do, or how to do it; instead he takes us on a journey of discovery that leaves us to continue making our own discoveries. The narrative style, comprehensive review of relevant literature, and generous endnotes make this not only a joy to read, but also a trove of scholarly references enticing the reader to explore further."

(*Journal of Planning Education and Research*)

"In an era when we rarely take the time to plan the consequence of our actions, *Human Ecology* renews the call for learning the big lesson from natural systems...Steiner's work adds another sorely needed and complete examination of the underpinnings of a sustainable design process."

(*CITE*)

"Rather than a definitive text on human ecology, as the title might imply, we are treated to an essay, a personal exploration of the intellectual eddies and meaningful moments that have shaped [Steiner's] experience of human settlements, from Austin to Rome."

(Planning Forum)

"A genial introduction to ecology, urban spaces, and their surroundings."

(CHOICE)

*"Human Ecology* is a fascinating, scholarly examination of the 'human ecology', or the interplay between humans and environment. ... A 'must-read' for environmental scientists, landscape planners, municipal leaders, and concerned citizens"

(Midwest Book Review)

"Steiner leads us to discoveries in our own homes and yards as well as in neighborhoods, cities, and the countryside...[uncovering] layer after delightful layer of insight into the intertwining arms of nature and people... Dig deeply; herein lies a treasure trove of wisdom."

(Richard TT Forman *Harvard University, from the foreword*)

About the Author

Frederick Steiner is dean of the School of Architecture at the University of Texas, Austin. His books include *Design for a Vulnerable Planet; The Living Landscape; To Heal the Earth* with Ian McHarg; and *Urban Ecological Design* with Danilo Palazzo.

## Users Review

**From reader reviews:**

**Ellen Wirth:**

Book will be written, printed, or descriptive for everything. You can realize everything you want by a e-book. Book has a different type. As you may know that book is important issue to bring us around the world. Next to that you can your reading expertise was fluently. A publication *Human Ecology: How Nature and Culture Shape Our World* will make you to possibly be smarter. You can feel a lot more confidence if you can know about anything. But some of you think that open or reading any book make you bored. It's not make you fun. Why they might be thought like that? Have you seeking best book or appropriate book with you?

**Doris Stanford:**

Reading a reserve can be one of a lot of task that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people fantastic. First reading a e-book will give you a lot of new facts. When you read a guide you will get new information because book is one of numerous ways to share the information or even their idea. Second, studying a book will make anyone more imaginative. When you reading through a book especially fictional works book the author will bring one to imagine the story how the personas do it anything. Third, you may share your knowledge to other folks. When you read this *Human Ecology: How Nature and Culture Shape Our World*, it is possible to tells your family, friends as well as soon about yours reserve. Your knowledge can inspire others, make them reading a reserve.

**Charles Davis:**

Precisely why? Because this Human Ecology: How Nature and Culture Shape Our World is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will surprise you with the secret the idea inside. Reading this book close to it was fantastic author who else write the book in such amazing way makes the content inside easier to understand, entertaining means but still convey the meaning completely. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book get such as help improving your proficiency and your critical thinking method. So , still want to hold up having that book? If I were you I will go to the reserve store hurriedly.

**Brenda Carey:**

Do you one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Attempt to pick one book that you just dont know the inside because don't ascertain book by its deal with may doesn't work at this point is difficult job because you are scared that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer could be Human Ecology: How Nature and Culture Shape Our World why because the amazing cover that make you consider in regards to the content will not disappoint an individual. The inside or content will be fantastic as the outside or perhaps cover. Your reading sixth sense will directly guide you to pick up this book.
