Statistical Analysis of Spatial and Spatio-Temporal Point Patterns, Third Edition (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) By Peter J. Diggle

Written by a prominent statistician and author, the first edition of this bestseller broke new ground in the then emerging subject of spatial statistics with its coverage of spatial point patterns. Retaining all the material from the second edition and adding substantial new material, **Statistical Analysis of Spatial and Spatio-Temporal Point Patterns, Third Edition** presents models and statistical methods for analyzing spatially referenced point process data.

Reflected in the title, this third edition now covers spatio-temporal point patterns. It explores the methodological developments from the last decade along with diverse applications that use spatio-temporally indexed data. Practical examples illustrate how the methods are applied to analyze spatial data in the life sciences.

This edition also incorporates the use of R through several packages dedicated to the analysis of spatial point process data. Sample R code and data sets are available on the author's website.

Editorial Review

Review

"... a valuable addition to the existing literature as it covers a number of topics in point pattern analysis, ranging from the basics of spatial point pattern statistical analysis to more recent developments in the spatio-temporal context. A number of examples are discussed throughout the chapters, which should facilitate the reading for practitioners of applied statistics from various disciplines. Besides this, the fact that data sets and R codes are available online certainly constitutes a nice addition to this application-oriented textbook."

?*Mathematical Reviews*, January 2015

"... well written, concise, and handy. ... there are remarkable changes in fundamentals [in this edition]. ... All concepts are well illustrated using interesting examples. ... an excellent introduction to point process statistics, in particular for beginners."

?*Biometrical Journal*, 2014

About the Author

Peter Diggle is a Distinguished University Professor and group leader of CHICAS at Lancaster University. Dr. Diggle is also an adjunct professor of biostatistics at both Johns Hopkins University's and Yale University's Schools of Public Health, adjunct senior researcher in the International Research Institute for Climate and Society at Columbia University, professor of epidemiology and statistics at the University of Liverpool, a trustee for Biometrika, founding co-editor and advisory board member for *Biostatistics*, and chair of the Strategic Skills Fellowships Panel of the Medical Research Council. His research focuses on the development and application of statistical methods to the biomedical and health sciences.

Users Review

From reader reviews:

Kirk Fonseca:

What do you think about book? It is just for students because they're still students or that for all people in the world, what best subject for that? Simply you can be answered for that question above. Every person has distinct personality and hobby for each and every other. Don't to be obligated someone or something that they don't desire do that. You must know how great along with important the book Statistical Analysis of Spatial and Spatio-Temporal Point Patterns, Third Edition (Chapman & Hall/CRC Monographs on Statistics & Applied Probability). All type of book is it possible to see on many options. You can look for the internet resources or other social media.

Bethel Stockton:

The e-book with title Statistical Analysis of Spatial and Spatio-Temporal Point Patterns, Third Edition

(Chapman & Hall/CRC Monographs on Statistics & Applied Probability) has lot of information that you can learn it. You can get a lot of help after read this book. This kind of book exist new know-how the information that exist in this publication represented the condition of the world today. That is important to you to find out how the improvement of the world. This particular book will bring you within new era of the syndication. You can read the e-book on your smart phone, so you can read the item anywhere you want.

Christa Nisbet:

A lot of people always spent their free time to vacation or maybe go to the outside with them loved ones or their friend. Do you realize? Many a lot of people spent that they free time just watching TV, as well as playing video games all day long. If you wish to try to find a new activity here is look different you can read the book. It is really fun in your case. If you enjoy the book which you read you can spent the whole day to reading a guide. The book Statistical Analysis of Spatial and Spatio-Temporal Point Patterns, Third Edition (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) it is extremely good to read. There are a lot of people that recommended this book. These people were enjoying reading this book. In case you did not have enough space to develop this book you can buy often the e-book. You can more very easily to read this book from a smart phone. The price is not to cover but this book offers high quality.

Florence Lentz:

Reading can called mind hangout, why? Because if you are reading a book specifically book entitled Statistical Analysis of Spatial and Spatio-Temporal Point Patterns, Third Edition (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) your head will drift away through every dimension, wandering in most aspect that maybe mysterious for but surely will become your mind friends. Imaging each and every word written in a guide then become one type conclusion and explanation this maybe you never get prior to. The Statistical Analysis of Spatial and Spatio-Temporal Point Patterns, Third Edition (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) giving you yet another experience more than blown away your thoughts but also giving you useful data for your better life on this era. So now let us demonstrate the relaxing pattern is your body and mind will likely be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary paying spare time activity?
