Encyclopedia of Biometrics

From Springer

Encyclopedia of Biometrics From Springer

This encyclopedia provides a comprehensive reference to topics in biometrics including concepts, modalities, algorithms, devices, systems, security, performance testing, applications and standardization. With an A–Z format and over 1400 entries, it provides easy access to relevant information on all aspects of biometrics for those seeking entry into this broad field.

Entries are written by experts in biometrics and related fields. Each entry includes a definition, key words, list of synonyms, list of related entries, illustration(s), applications and a bibliography. Most entries include useful literature references providing the reader with a portal to more detailed information.

Comprehensive and tutorial, the *Encyclopedia of Biometrics, 2nd Edition* is a practical resource for experts in the field and professionals interested in aspects of biometrics.

Editorial Review

Review

"The 'Encyclopedia of Biometrics' is the foremost reference for anyone needing information on the subject. … This outstanding volume serves not only as a quick reference for a quick definition or explanation of a concept, but also as a guide to deeper investigations into new ways of applying computer technologies to biomedicine." (Steven Brock, Amazon.com, July, 2015)

About the Author

Stan Z. Li received his B.Eng from Hunan University, China, M.Eng from National University of Defense Technology, China, and PhD degree from Surrey University, UK. He is currently a professor at the National Laboratory of Pattern Recognition and the director of the Center for Biometrics and Security Research (CBSR), Institute of Automation (CASIA) and the director of the Center for Visual Internet of Things Research (VIOT), Chinese Academy of Sciences. He was elevated to IEEE Fellow in2009. His research interest includes pattern recognition and machine learning, image and vision processing, face recognition and video analytics. He has published over 300 papers in international journals and conferences and authored and edited 8 books including "Markov Random Field Models in Image Analysis" (Springer, 1st edition 1995, 2nd edition 2001, 3rd edition 2009) and "Handbook of Face Recognition" (Springer, 1st edition 2005, 2nd edition 2011).

Anil K. Jain, Ph.D. (Ohio State University, USA) is a University Distinguished Professor in the Department of Computer Science & Engineering at Michigan State University. His research interests include pattern recognition, computer vision and biometric recognition. He has co-authored and co-edited several books, including "Introduction to Biometrics" (Springer, 2011) and "Algorithms for Clustering Data" (Prentice Hall, 1998). He served as the editor-in-chief of the IEEE Transactions on Pattern Analysis and Machine Intelligence (1991-

94) and has received a number of awards including Guggenheim fellowship, Humboldt research award, Fulbright award and King-Sun Fu award.

Users Review

From reader reviews:

Jean Fuller:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to find out everything in the world. Each reserve has different aim or even goal; it means that guide has different type. Some people experience enjoy to spend their a chance to read a book. They are really reading whatever they get because their hobby is definitely reading a book. Consider the person who don't like examining a book? Sometime, individual feel need book after they found difficult problem or maybe exercise. Well, probably you'll have this Encyclopedia of Biometrics.

Leonard Parnell:

You can obtain this Encyclopedia of Biometrics by browse the bookstore or Mall. Just simply viewing or reviewing it might to be your solve problem if you get difficulties for the knowledge. Kinds of this publication are various. Not only simply by written or printed but can you enjoy this book by means of e-book. In the modern era such as now, you just looking by your local mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose right ways for you.

Julio Yates:

That reserve can make you to feel relax. That book Encyclopedia of Biometrics was colorful and of course has pictures around. As we know that book Encyclopedia of Biometrics has many kinds or category. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore , not at all of book are usually make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading which.

Diane Lomas:

As a scholar exactly feel bored to be able to reading. If their teacher expected them to go to the library or to make summary for some reserve, they are complained. Just small students that has reading's soul or real their leisure activity. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that examining is not important, boring and also can't see colorful images on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Encyclopedia of Biometrics can make you truly feel more interested to read.
