**The worst of nature and the worst of science will bring the human race to the brink of extinction...**

Master Sergeant Reed Beckham has led his Delta Force Team, codenamed Ghost, through every kind of hell imaginable and never lost a man. When a top secret Medical Corps research facility goes dark, Team Ghost is called in to face their deadliest enemy yet--a variant strain of Ebola that turns men into monsters.

After barely escaping with his life, Beckham returns to Fort Bragg in the midst of a new type of war. The virus is already spreading... As cities fall, Team Ghost is ordered to keep CDC virologist Dr. Kate Lovato alive long enough to find a cure. What she uncovers will change everything.

Total extinction is just on the horizon, but will the cure be worse than the virus?
