Guided Implantology Made Easy By August de Oliveira

This is the Second Edition of Guided Implantology Made Easy. Guided Implantology Made Easy is a "cookbook" approach to placing implants via Guided Surgery. Written for the new user, every aspect of Guided Implantology is broken down into easy to follow protocols. From cone beam basics to mastering edentulous cases, the reader will get a good overview of the entire process. A detailed Dental Anatomy section breaks down each tooth by dimension, angulation and occlusion to help you plan your cases. Step by step protocols will make planning in Guided Surgery software easier and more accurate. Although this is written using the Galileos system, all the principles contained apply to any Guided Implant system. Advances in CEREC technology including CEREC integration, chair side milled CEREC Guides and Opti Guides are covered as well as the SiCAT Classic Guide system. Tips and tricks to make edentulous cases go smoother will also be covered. Implants just got a whole lot easier!
