**Architectural Woodwork Standards** By Architectural Woodwork Institute (AWI), Architectural Woodwork Manufacturers Association of Canada (AWMAC), Woodwork Institute (WI)

This first edition of The Architectural Woodwork Standards is a definitive reference manual designed to simplify and clarify guidelines, information and principles required for fabrication, finishing and installation of architectural woodwork. It provides design professionals with a logical and facile means to comprehensively specify woodwork elements. The AWS includes compliance criteria to ensure that all millwork manufacturers are competing equally when bidding on projects and they are obligated to perform work of equal quality. The Standards, as in both previous publications, encompass three grades of quality: Economy, Custom and Premium. The AWS also includes a comprehensive glossary of terms. Any AWS errors and their corrections will be updated on the AWS Errata webpage on an as needed basis. All users of the new AWS are encouraged to check errata prior to beginning the specification of any new project.
