Structural Analysis By Aslam Kassimali

The 5th edition of the classic STRUCTURAL ANALYSIS by Aslam Kassamali teaches students the basic principles of structural analysis using the classical approach. The chapters are presented in a logical order, moving from an introduction of the topic to an analysis of statically determinate beams, trusses and rigid frames, to the analysis of statistically indeterminate structures. The text includes solved problems to help illustrate the fundamental concepts. Access to interactive software for analyzing plane framed structures is available for download via the text's companion website.

Editorial Review

Review

"The textbook is well-written. It starts with topics that are already familiar to students (e.g. statically determinate analysis of truss and beam), then move to new and challenging topics (e.g. influence line and statically indeterminate structural analysis). The connection between the subjects are good."

"This is a very comprehensive textbook. The real strength of the book is Part Three on indeterminate structures and Chapter 10 on symmetry/antisymmetry which is often missing in other texts. Reading the book, one gets the sense that the author has much practical experience in structural analysis and design."

About the Author

Aslam Kassimali is Professor of Civil Engineering at Southern Illinois University. He teaches structural engineering, nonlinear structural analysis, and structural dynamics and stability. Consistently recognized for teaching excellence, Dr. Kassimali has received 19 awards for outstanding teaching at the department and the college level since joining Southern Illinois University-Carbondale in 1980. In 1996 he was named the Outstanding Teacher of the entire university, and in 2004 he was awarded the title of Distinguished Teacher. Professor Kassimali completed undergraduate work at the University of Karachi in Pakistan in 1969, earned a master's degree from Iowa State University in 1971, and masters and doctoral degrees from the University of Missouri, Columbia, in 1974 and 1976 respectively.

Users Review

From reader reviews:

Stephen Vancleave:

Here thing why this particular Structural Analysis are different and dependable to be yours. First of all studying a book is good nonetheless it depends in the content than it which is the content is as delicious as food or not. Structural Analysis giving you information deeper since different ways, you can find any guide out there but there is no publication that similar with Structural Analysis. It gives you thrill reading journey, its open up your own personal eyes about the thing in which happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in playground, café, or even in your means home by train. If you are having difficulties in bringing the published book maybe the form of Structural Analysis in e-book can be your substitute.

Elsie Fiala:

This Structural Analysis is great e-book for you because the content which can be full of information for you who also always deal with world and also have to make decision every minute. This kind of book reveal it details accurately using great plan word or we can say no rambling sentences inside it. So if you are read that hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but tough core information with splendid delivering sentences. Having Structural Analysis in your hand like getting the world in your arm, information in it is not ridiculous a single. We can say that no reserve that offer you world with ten or fifteen tiny right but this guide already do that. So , this is certainly good reading book. Hey there Mr. and Mrs. stressful do you still doubt in which?

Adeline Bonds:

That publication can make you to feel relax. That book Structural Analysis was colorful and of course has pictures on the website. As we know that book Structural Analysis has many kinds or type. Start from kids until young adults. For example Naruto or Private eye Conan you can read and think that you are the character on there. So , not at all of book usually are make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading in which.

Tammy Robinson:

What is your hobby? Have you heard in which question when you got learners? We believe that that problem was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And you know that little person such as reading or as reading through become their hobby. You have to know that reading is very important and also book as to be the issue. Book is important thing to add you knowledge, except your personal teacher or lecturer. You will find good news or update regarding something by book. Amount types of books that can you go onto be your object. One of them is Structural Analysis.
