## **Human Pharmaceuticals in the Environment: Current and Future Perspectives (Emerging Topics in Ecotoxicology: Principles, Approaches and Perspectives, Vol. 4) From Springer**

Human interaction with the environment remains one of the most pervasive facets of modern society. In a world characterized by rapid population growth, unprecedented global trade and digital communications, energy security, natural resource scarcities, climatic changes and environmental quality, emerging diseases and public health, biodiversity and habitat modifications are routinely touted by the popular press as they canvas global political agendas and scholarly endeavors.
