## **Editorial Review**

### **Review**

"Yes, this chapter introduces a wide array of technical terminology, in which the author does a fantastic job of breaking it down so that novice learners can comprehend it. Yes, the examples in this chapter are excellent in that they allow the reader to relate to the technical concepts in a comparative way. The Hands-on Projects for this chapter tie in well with the material presented. I believe that they provide students with several different ways to see how some of the attacks explained in the chapter are executed and how they can be prevented. I am now officially excited about the publication of this text, wish it was available for the Summer 2011 section that I am teaching using the 3rd edition."

"Clear and Concise coverage of a difficult and dynamic subject. Engaging for students, using examples and stories."

"An excellent introduction to different types of Malware. An excellent coverage of Social Engineering techniques. Chapter one gives an overview of Information Security and threats. The fact that author has included one of the most current security threat (Stuxnet) at the beginning of the chapter is excellent. This will get the attention of the learners."

### **About the Author**

Mark Ciampa is Assistant Professor of Computer Information Systems at Western Kentucky University in Bowling Green, Kentucky. Previously, he served as Associate Professor and Director of Academic Computing for 20 years at Volunteer State Community College in Gallatin, Tennessee. Dr. Ciampa has worked in the IT industry as a computer consultant for the U.S. Postal Service, the Tennessee Municipal Technical Advisory Service, and the University of Tennessee. He is also the author of many Cengage/Course Technology books, including Security+ Guide to Network Security Fundamentals; CWNA Guide to Wireless LANs, 3e; CWSP Guide to Wireless Security; Guide to Wireless Communications; and Networking BASICS. He holds a PhD in digital communication systems from Indiana State University.

## **Users Review**

### **From reader reviews:**

#### **Lee Nelson:**
