The Market is not Random. (Unabridged, First Edition): Time & Price Symmetry / Quantitative Synchronicity Defined By Mr Anthony Joseph Klatch II

W.D. Gann and the mathematician Fibonacci were born in the wrong century. They laid the groundwork for what was to become the ability to predict the financial markets through Time and through Price, which is now coined as “The Marketome,” by the author. However, it took a mind at rest – a mind left to merge their theories – in order to finish the work they both started hundreds of years ago. As the author can validate, he has amassed over 30,000 hours of market experience before his thirtieth birthday, which speaks of his obsession with numbers. That obsession has yielded conclusive determinism about the market movements. Therefore, through Klatch’s Price Theory and the included disproof of the Efficient Market Hypothesis, which properly rebuts the all-time bestseller of Malkiel’s, “A Random Walk Down Wall Street,” your author proves that the market is not random; a piece of information that once accepted and digested by the masses may lead to Nobel edification. The Market is Not Random is as academic as it is enlightening. It is written from a non-fiction perspective, with the emotions of the author’s life struggle in quantifying the irrational that led to madness. However, that madness was born from an obsession with the markets, and ultimately, the pursuit of knowledge became so reckless that it led to the author’s federal conviction and permanent ban from the securities industry. TMINR is the crowning achievement of a lifetime of work, and it will withstand the test of time because it proves that every market and every time frame are not random.

Editorial Review

About the Author

Mr. Anthony J. Klatch II was born in Hazleton, PA, and was classified as a genius at the age of five years old by scoring 174 IQ on the Wechsler Intelligence scale. At the age of 22 he was given the Wonderlic Test of personality/intelligence, and he scored at 47 out of 50. His parents were both academics, and his father taught English and French for nearly thirty years, which fueled a drive for writing. Up until 2011, Mr. Klatch had a well respected reputation as a seasoned financial manager providing invaluable insight to all aspects of hedge fund management including: portfolio management; risk control; and asset allocation related to various fund product offerings and corporate institutional mandates. He has been recognized as a talented manager with an exceptional track record for increasing the performance of funds through the use of a wide range of sophisticated quantitative analysis techniques that Mr. Klatch refined after mentoring with a hedge fund billionaire for several years. In 2006, he received honors in Trader Monthly Magazine for his stellar performance as both a fund manager and corporate risk management professional as one of the top 30 traders in the country. Mr. Klatch's cross-functional expertise in both financial management and technology has its foundations in his dual educational credentials. Mr. Klatch was educated in the MBA program in Project Management from Lehigh University, recognized as one of the top five MBA providers in the country. He also earned a B.S. in Information and Systems Engineering in addition to an Honors Degree in the prestigious Integrated Business and Engineering Honors Program from Lehigh University. Despite Mr. Klatch's success, his young age led to some reckless decisions. Mr. Klatch was indicted in 2011 by the federal government, and he subsequently accepted a guilty plea to four felony counts: Conspiracy to Defraud the United States, Securities Fraud, Wire Fraud, and Money Laundering. Mr. Klatch acknowledges that he engaged in deceptive marketing tactics, which led to some investor losses during the 2008-2010 financial crisis. However, he accepted responsibility for his actions, and successfully served a five-year federal prison sentence. Today, he is actively pursuing various avenues in order to make full restitution to his alleged victims.

Users Review

From reader reviews:

Mary Banks:

Information is provisions for people to get better life, information these days can get by anyone on everywhere. The information can be a understanding or any news even a huge concern. What people must be consider whenever those information which is inside the former life are difficult to be find than now is taking seriously which one works to believe or which one the actual resource are convinced. If you get the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All those possibilities will not happen in you if you take The Market is not Random.
