**As Done Unto You: The Secret Confession of Amanda Knox** By Andrew G. Hedges M.D.

"To put it simply, murderers MUST confess..." In past cases, forensic profiler Andrew Hodges decoded documents that pointed to the truth of the Nicole Simpson murder in Los Angeles, the Jon Benét Ramsey "kidnapping" case in Colorado, and the mysterious disappearance of Natalie Holloway in Aruba. His cutting-edge psycholinguistic method, "thoughtprint decoding," shows how killers leave unique mental messages behind much like fingerprints. Now, in *As Was Done Unto You*, he turns his attention to a lengthy and revealing email written by murder suspect Amanda Knox, accused of killing her college roommate in Perugia, Italy, on November 1, 2007. In those five pages, Hodges—an experienced psychiatrist—found that Knox had unknowingly confessed to the brutal crime in great detail. Between the lines her email represented a secret narrative—the whole story. In this eye-opening study of one of the 21st century's most controversial murder cases, Dr. Hodges cites passages from Amanda's memoir, *Waiting to Be Heard*, to corroborate the confession found in the Nov. 4 email. He also delves into the shady backgrounds of Kercher's killers, identifies Amanda as the ringleader of the "gang of three," and places the brutal crime in the context of Halloween night in party-town Perugia. Readers will learn that Amanda is obsessed with vampirism, sex, drugs and rock'n'roll—but secretly driven by a shocking trauma. She does unto Meredith "as was done unto her." Dr. Hodges' ground-breaking investigative technique shows how criminal investigations will be conducted in the future as police detectives learn to utilize the most capable part of the human mind. This new way of profiling can lead investigators to perpetrators while explaining motives. By decoding psycholinguistic messages phrase by phrase, word by word, detectives can uncover the hidden agendas that motivate murderers. "Once again Dr. Hodges shows police investigators how a suspect's unconscious super intelligence communicates. He reveals a trove of information culled from Amanda Knox's five-page email and her other crucial communications shortly after the crime. Knox's super-intel told us what really happened when Meredith Kercher was murdered, if only those interrogating her were trained in decoding her hidden confession." —Charles Donald Byron, Special Agent, FBI (retired)

## **Editorial Review**

### **About the Author**

ANDREW G. HODGES, M.D., is a psychiatrist in private practice, a former clinical professor of psychiatry (UAB School of Medicine), and a noted forensic profiler. Experts including experienced FBI agents believe his unique “thoughtprint decoding” method will one day become a fixture in law enforcement much as identifying fingerprints. The author of eight books, Dr. Hodges has been interviewed extensively in the media with appearances on Fox News, CNN, ABC, MSNBC and Court TV.

## **Users Review**

### **From reader reviews:**

#### **Lucinda Smith:**
