## Newton's Telecom Dictionary From Telecom Pub

This is a business dictionary of 29,019 defined technology terms -- covering the latest in telecommunications, computing, the Internet, The Internet of Things, networking and social media. It's a complete dictionary/encyclopedia of today's information technology. It is used by everyone from salesmen to lawyers, from corporate trainers to college educators, from corporate users to engineers. It is set as a required textbook in colleges teaching telecommunications and information technology. As the cover says, the massive 1450-page book covers everything in voice, data, images, apps and video. The book is written for businesspeople in non-technical language.

Newton and his team expand and update the dictionary every day of the year, which makes it about as up to date as you can get. No other dictionary/encyclopedia is updated as regularly as this one is. This is the 30th edition. No other dictionary in the entire history of publishing has gone through 29 editions -- each one improved, expanded and updated. We skipped the 29th because we wanted to highlight the enormous improvements, fixes, updates and additions in this new 30th edition. There are 4.4% more definitions (1,214 more) in this 30th edition.

Several reviewers (and customers) refer to Newton's Telecom Dictionary as the industry "bible." Originally just telecommunications, it now covers computing, networking, and all the newer allied technology fields.

A feature of the dictionary is that many of the definitions are not just an explanation of the technology, but also a primer on how the technology is used. Do's and don't about using the technology. Tips from personal experience. What works and what doesn't. What to watch out for. Warnings.

## **Editorial Review**

About the Author

**HARRY NEWTON**

**Editor**

**Newton works on this dictionary every day of the year, He adds new terms. He updates old terms, He sees this "dictionary" as a combination dictionary/encyclopedia/history/story of the industry. He wants the dictionary to be the definitive record of the industry's progress. Newton entered telecommunications forty six years ago. He started consulting and quickly learned that the industry lacked up-to-date information. (The Internet had not yet been invented.) He went on to create six successful telecommunications magazines -- Teleconnect, Call Center, Computer Telephony, Imaging, LAN (later called Network Magazine), and Telecom Gear. He also founded the immensely successful shows Call Center Demo, and the Computer Telephony Conference and Exposition, which at its peak attracted 26,000 people to the Los Angeles Convention Center. He also published over 47 books on networking, imaging, telecommunications and computer telephony.**

**Newton has an economics degree from the University of Sydney and an MBA from the Harvard Business School.**

**STEVE SCHOEN**

**Technical Editor**

**Steve Schoen began working in the telecommunications industry in 1984, the same year that the first edition of Newton's Telecom Dictionary was published. Steve has worked in a variety of senior telephone company positions over the years, first at GTE, then at Verizon Communications, and now at Hawaiian Telcom. He started out working for one of GTE's local phone companies in Hawaii, and in 1989 moved over to one of GTE's international business units, also located in Hawaii, which became part of Verizon Communications following GTE's merger with Bell Atlantic. He is now Senior Manager Market Research at Hawaiian Telcom, which was formed when Verizon sold off some of its Hawaii operations.**

On nights and weekends since the late 1980s, Steve has been moonlighting as an instructor at colleges and universities in Hawaii and on the mainland, teaching C, SQL, database management, and e-business classes, both on-ground and online. He also is a technology columnist for Pacific News Bytes magazine. In prior existences, he taught math in England, worked for a federally funded project that developed textbooks in the native languages of Micronesia, and served four years in the U.S. Army.

**ABOUT GAIL SAARI**

**Artistic Director**

Gail Saari has been the designer, artist, production manager, and associate editor for Newton's Telecom Dictionary, 22nd to 30th editions. That means she edits, designs, and produces the dictionary. The pleasure that you get from holding, reading and enjoying this book is directly due to Ms. Saari's superb professional efforts. For an artistic director, she brings a unique skillset to her job. She has an M.A. Summa Cum Laude in International Affairs from Ohio University and a B.A. in English literature from the University of Tennessee. Along the way she developed extensive artistic and technical design skills, having spent almost

two decades designing and producing books and monthly print magazines.

Her publications have received the highest accolades from readers and, most importantly, from her clients. Harry Newton says of Ms. Saari, "She is the only artist I've ever worked with who understands the material she's working with, and questions what she sees as problems (she's always right). She makes constructive suggestions, which I always follow. I love the fact that she has a sound grasp of computer and information technologies-their use, their meaning, and their application."

Ms. Saari has worked most recently as Publications and IT Director for The Independent Institute where she oversaw production of books, periodicals, and all things electronic. Previously, she worked as Managing Editor for CMP/Backbeat Books and as Publications Director for the Malaysian Nature Society.

She lived in Malaysia for fifteen years, working as an editor and translator (from Malay to English) for many clients, including Technical and Linguistic Services, the Malaysian National Museum, National History Museum of Malaysia, and the 1998 Commonwealth Games. She has contributed articles on the environment, travel, and culture to Salon.com, Men's Review Magazine, Marie Claire, the Insight Guide to Malaysia, and other publications.

Ms. Saari lives in Berkeley, CA and runs G. Saari Productions, an independent design and production studio, which you can hire, whose clients include The Yoga Room and this dictionary.

## **Users Review**

### **From reader reviews:**

#### **Amber Orlowski:**

What do you concentrate on book? It is just for students since they're still students or it for all people in the world, what the best subject for that? Just simply you can be answered for that query above. Every person has various personality and hobby per other. Don't to be pushed someone or something that they don't would like do that. You must know how great and important the book Newton's Telecom Dictionary. All type of book is it possible to see on many resources. You can look for the internet methods or other social media.

#### **Luis Martin:**

People live in this new day time of lifestyle always attempt to and must have the time or they will get wide range of stress from both day to day life and work. So , whenever we ask do people have free time, we will say absolutely without a doubt. People is human not really a robot. Then we question again, what kind of activity do you possess when the spare time coming to a person of course your answer will certainly unlimited right. Then do you ever try this one, reading guides. It can be your alternative with spending your spare time, typically the book you have read will be Newton's Telecom Dictionary.

#### **Paul Greenblatt:**

Your reading sixth sense will not betray a person, why because this Newton's Telecom Dictionary e-book written by well-known writer who really knows well how to make book that may be understand by anyone

who have read the book. Written inside good manner for you, leaking every ideas and writing skill only for eliminate your own personal hunger then you still doubt Newton's Telecom Dictionary as good book but not only by the cover but also with the content. This is one publication that can break don't determine book by its cover, so do you still needing an additional sixth sense to pick this specific!? Oh come on your examining sixth sense already said so why you have to listening to an additional sixth sense.

**Sylvia Kirby:**

In this period of time globalization it is important to someone to receive information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of sources to get information example: internet, newspapers, book, and soon.
