IQ Testing 101 is a must read for anyone (including IQ test administrators) looking for a clear, erudite, thought provoking, even entertaining introduction to the important issues surrounding IQ including the definitions, measurements, and development of human intelligence. So much is at stake with IQ testing and these ideas cannot be ignored. "

--**Scott Barry Kaufman**, PhD (unrelated)
Yale University, Dept of Psychology
Co-Editor of *The Cambridge Handbook of Intelligence* (with Robert J. Sternberg)

[T]his book will find its way into many college syllabi, not only because of the depth and breath of its coverage, but because of the wonderful way in which Dr Kaufman is able to make a difficult, often misunderstood topic so clear and thoroughly enjoyable."

--**Ron Dumont**, EdD, NCSP
Director of the Masters and Doctoral Programs in School Psychology

This essentially tiny volume manages to cover the history of intelligence measurement, genetic versus environmental sources of intelligence, controversial issues in psychometrics and usage, summaries of research on cognitive profiles of specific populations, the future of the IQ construct, and measurement of cognitive abilities in general. To get that much perspective into such small print space requires an experienced and objective author and Alan Kaufman manages the task very well."

Kaufman earned an AB degree from the University of Pennsylvania in 1965; an MA in Educational Psychology from Columbia University in 1967; and a PhD from Columbia University in 1970 (under Robert L. Thorndike in Psychology: Measurement, Research, and Evaluation). While Assistant Director at The Psychological Corporation from 1968 to 1974, Kaufman worked closely with David Wechsler on the revision of the Wechsler Intelligence Scale for Children (WISC) and supervised the standardization of the revised version—the WISC-R. He also collaborated with Dorothea Mc-Carthy in the development and standardization of the McCarthy Scales of Children's Abilities. From the mid-1970s to the present, Kaufman has held several university positions prior to his current professorship at Yale, most notably at the University of Georgia (1974-1979) and the University of Alabama (1984-1995). Kaufman's texts, including Intelligent Testing With the WISC-R (1979), Assessing Adolescent and Adult Intelligence (1990), and Intelligent Testing With the WISC-III (1994), have been widely used for the interpretation of Wechsler's scales for children, adolescents, and adults. In 2009 he coauthored Essentials of WAIS-IV Assessment (with Liz Lichtenberger) and the second edition of Essentials of WISC-IV Assessment (with Dawn Flanagan). Kaufman's tests, developed with his wife Nadeen—most notably the 1983 Kaufman Assessment Battery for Children (K-ABC) and its 2004 revision (KABC-II)—have been widely used throughout the world to measure children's intelligence. Kaufman is a Fellow of four divisions of the American Psychological Association (APA) and of the Association for Psychological Science (APS) and is a recipient of the Mensa Education and Research Foundation Award for Excellence (1989).
